Power Balance Series

Features

The PB-SERIES is an active harmonic filter system for tower buildings as well as automation, windturbine and various other industrial applications eliminating harmonic oscillations and consequently costs for reactive energy. The filter monitors the current signal and compensates for the unwanted elements of the measured current. Thus, the filter ensures a harmonic suppression independently of the number of loads. Furthermore the filter corrects the power factor, improving the systems' efficiency while reducing harmonic distortion.

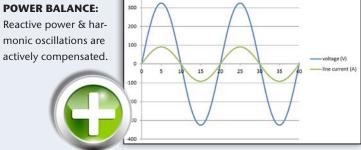

Without **POWER BALANCE:**

Harmonic disturbances caused by e.g. non-linear loads.

Reactive power & harmonic oscillations are actively compensated.

Specifications

Input & Output Parameters

Connectivity	3 wire: 3 phase								
	4 wire: 3 phase + neutral load								
Phase compensation current	60A	120A	180A	240A	300A				
Neutral lead compensation	180A	360A	540A	720A	900A				
current									
Input voltage	3-wire: 200 V - 480 V ± 10%								
	4-wire: 200 V - 400 V ± 10%								
Frequency	50/60 Hz ± 3 Hz								
Response time max.	< 21 µs								
Switching frequency	24 kHz								
Control frequency	48 kHz								
Harmonic compensation	Up to 50th harmonic, 50 active								
	harmonic orders simultaneous								
	selectable								
Power factor correction	Fully inductive and reactive								
	current compensation from 0 to								
	100%								
Features	- Load balancing								
	- Flicker compensation								
	(caused by reactive current)								
	- Reactive power compensation								
	- Modular design								
	- Parallel operation

Modular System

60 Amps Rack

consisting of

one module, 1 sensor unit & 1 display (optional)

120 Amp Rack

consisting of

two modules, 1 sensor unit & 1 display (optional)

180 Amps Rack

consisting of

three modules, 1 sensor unit & 1 display (optional)

240 Amps Rack

consisting of

four modules, 1 sensor unit & 1 display (optional)

300 Amps Rack

consisting of

five modules, 1 sensor unit & 1 display (optional)

Wall mount System

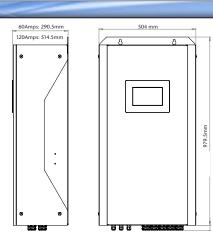

60 Amps Module (dimensional drawing below)

consisting of 1 module, 1 sensor unit & 1 display (optional)

120 Amps Module

consisting of 1 module, 1 sensor unit & 1 display (optional)
